1 This is a section name

1.1 This is a subsection

1.1.1 Subsubsection

paragraphs

- list
 - sub.list
 - list 2.0
1. numbered list
 1. numbered sub-list

2 Markdown commands:

2.1 HTML:

- `►`
- UTF-8 shapes
- references
- local image
- image from link
- italics
- bold text

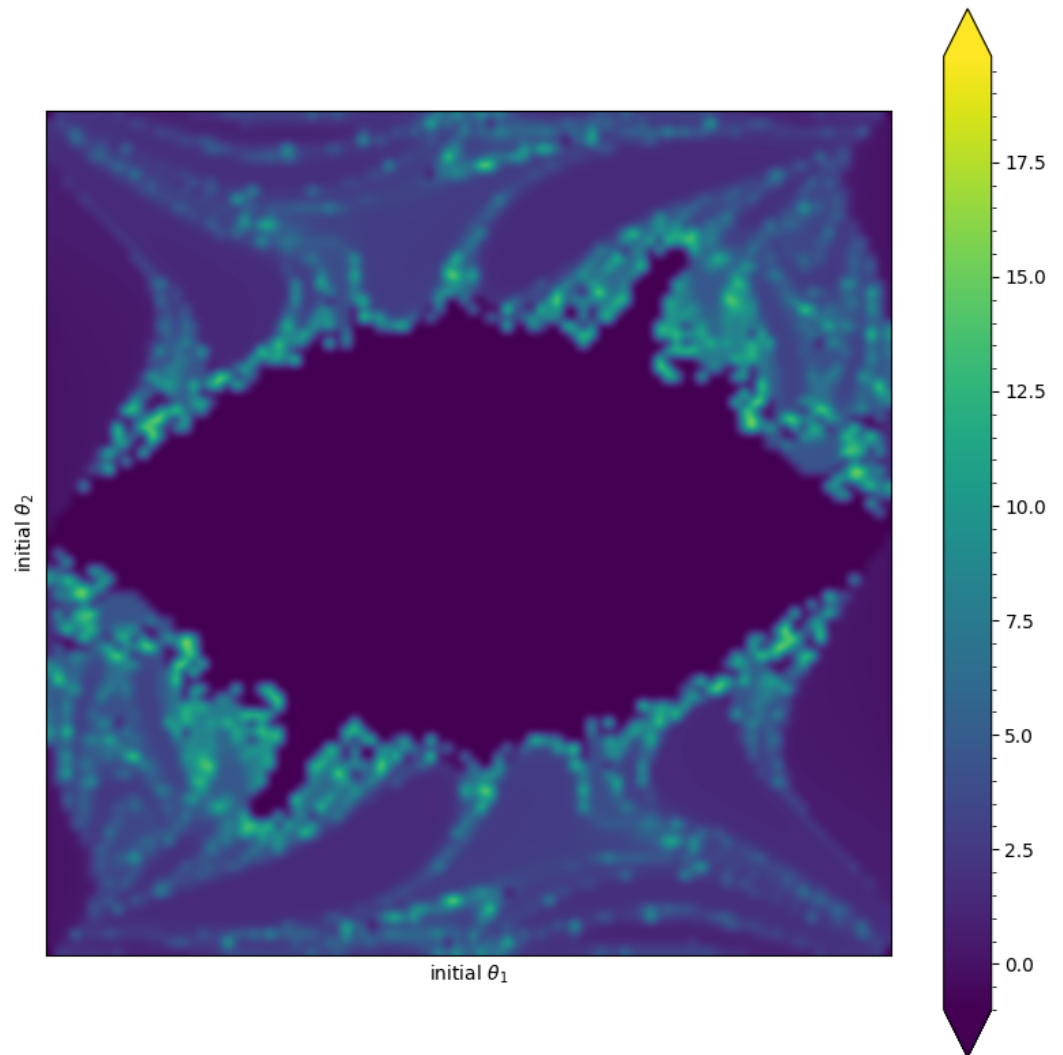

2.2 Markdown/ latex commands:

Use these if you want to save to pdf, as it uses latex converter and ignores HTML input

- latex equation = $\frac{a^2}{b}$
- `code style text`
- **bold text**
- *italic text* ***
- horizontal line

2.3 Links

- [Link to section](#)
- [HTML link](#)

- [External link](#)
- note that `nbconvert` for some reason cannot produce a pdf if you include images from external sources
